

# HANGING GUIDE

Here's how to hang your **PUMPED BALLOON BOUTIQUE** grab & go garland!

**NOTE:** If you are attaching to an already existing anchor point (railing etc.) use the long balloon or fishing line to loop around the balloon centreline and the anchor point. Tie a knot and proceed to step 5.

## 1. PREP

Hold up garland in preferred spot and take note of where to anchor the hooks (2). Wipe the surface of the wall where the hook will be installed for a better hold.

## 2. ANCHOR

Use the command hooks with the attached balloon bracelet to create the anchor point on the wall. Remove sticker & press firmly for 30 seconds. Leave for 10 minutes for best results.

## 3. ATTACH

While holding the garland in place stretch the balloon bracelet towards the closest balloon.

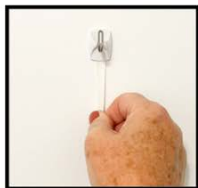

## 4. SECURE

Gently guide the balloon bracelet around the balloon and into its base or neck.

## 5. PRIMP

The mini balloons can be easily repositioned, so make sure they are towards the front. Adjust to get the look you like then let the **PARTY BEGIN!**

## 6. REMOVAL

Pumped Balloon Boutique is NOT responsible for damaged walls due to improper use/removal of command hooks. For guidance visit [command.com](http://command.com).
